

Search for Children with Disabilities

School districts throughout Ohio are participating in an effort to identify, locate, and evaluate all children with disabilities, birth through age 21. For children birth through age two, a disability means that a child has a delay in one or more of the following developmental areas: adaptive behavior, cognition, communication, physical development, sensory development, and/or social or emotional development.

For children ages three through five, a disability means that a child has a documented deficit in one or more of the following developmental areas: communication skills, hearing abilities, motor functioning, social-emotional/behavior functioning, or vision abilities.

For school-age students, a disability means a person having one or more conditions such as autism, developmental handicap, hearing handicap, multi handicap, orthopedic and/or health handicap, severe behavior handicap, speech and language handicap, specific learning disability, traumatic brain injury, or visual handicap.

Many unidentified children with disabilities are preschoolers.

If you know of a child who you think may have a disability, please contact: Marge Avram, Secretary to Coordinator of Special Education at 440-943-7775.
