

GUIDING PRINCIPLES

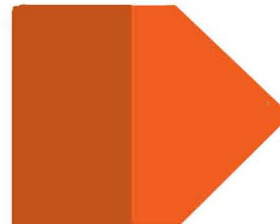

State-of-the-Art

Our schools should exhibit high quality construction and instruction supporting academic success and project based learning opportunities. They should be technology rich yet adaptive for future changes.

Community Hub

Our schools should promote a sense of pride among the community and within the buildings, incorporating the rich history and tradition. They should provide an opportunity for community and business partnerships through shared resources.

Safe & Sustainable

Our schools should promote the safety, of students and staff. Features should include, but not be limited to natural light and use of "green" materials.

Collaboration & Flexibility

Our schools should encourage collaboration among students and staff. They should offer flexible spaces and furniture to accommodate small and large groups as well as support a variety of learning styles.
